Subj: Testing requirements for 1975 through 1980 Triumphs

After checking with the vehicle manufacturer, the Air Quality Board has determined that 1975 through 1980 Triumphs were not designed to meet the Air Quality Board cut points for those years.

When testing this vehicle **ENTER THE MODEL YEAR AS 1974** so that the 1965 to 1974 cut points will apply. All other procedures for testing and/or waivers apply.
